

ADJUSTABLE PRECISION SHUNT REGULATORS HM432

DESCRIPTION & FEATURES
The HM432 series Ics are here-terminal adjustable shunt regulators with guaranteed thermal stability over a full operation range. These Ics freature sharp turn-on characteristics, low temperature coefficient and low output impedance, which make them ideal substitutes for Zener diodes in applications such as switching power supply, charger and other adjustable regulators. The HM432 precision reference is offered in three band gap tolerance: 0.5%, 1.0%, 1.5%
Adjustable output voltage from Vref to 18V Low dynamic output resistance: 250mΩ typical Sink current capacity from 60uA to 100 mA Typical equivalent full range temperature coefficient of 30 ppm/°C
Application:
PC Motherboard Voltage monitor Voltage Reference PWM down converter with reference Charger
